DISCHARGE SUMMARY

Department of Surgical Oncology (Uro-oncology unit)

Name: Mr. AMIT KUMAR MUNDA Age / Sex: 22 yrs / Male IPD No.: SCH/IPD/26/2741

Admitted on: 2nd July 2026 Operated on: 3rd July 2026 Discharged on: 5th July 2026

Consultant: Dr. Prashant Tirkey, M.Ch. (Surgical Oncology)

Diagnosis

Right testicular tumour (clinically non-seminomatous germ cell tumour) with raised tumour markers.

History

Painless progressive swelling of the right testis x 4 months, dull ache in the right groin, dry cough x 3 weeks. Right undescended testis operated (orchidopexy) in childhood. No other illness. College student.

Investigations

- USG scrotum (29/06/2026): 4.8 x 3.6 cm heterogeneous solid-cystic mass replacing most of the right testis, with internal vascularity; left testis normal.
- Tumour markers before surgery (01/07/2026): AFP 1,240 ng/mL, beta-hCG 3,850 mIU/mL, LDH 610 U/L.
- Chest X-ray: two small nodular opacities in the right lower zone - CECT chest and abdomen advised.

Operation

Right high inguinal orchidectomy on 03/07/2026 under spinal anaesthesia: cord clamped at the deep ring before mobilising the testis, then transfixed and ligated. Testicular prosthesis declined. Specimen sent for HPE.

Post-operative course

Uneventful. Ambulant on day 1; wound healthy. Semen cryopreservation was completed in the hospital andrology laboratory before surgery.

Discharge medicines

Medicine	Dose / timing	Duration
Tab. Cefuroxime axetil 500 mg	1-0-1 after food	5 days
Tab. Paracetamol 650 mg	1-1-1 if pain	5 days
Tab. Pantoprazole 40 mg	1-0-0 before breakfast	5 days
Povidone-iodine 5 % ointment	Local application on the wound, once daily	7 days

Follow-up

- Suture removal on 12/07/2026.
- Review in OPD with the HPE report and CECT chest, abdomen and pelvis; repeat AFP, beta-hCG and LDH 7 - 10 days after surgery.
- Medical oncology consultation for chemotherapy.
