RADIOTHERAPY TREATMENT SUMMARY

Short-course pre-operative radiotherapy (total neoadjuvant therapy)

Name:	**Raghavendra Shetty**	RT Reg. No.:	**KHR/26/0064**
Age / Sex:	59 Y / M	Date:	**9 Feb 2026**
Referred by:	Dr. Harish Bhandary, Netravati Gastro & Cancer Hospital	Radiation oncologist:	Dr. Vidya Kamath

Diagnosis: Adenocarcinoma rectum, moderately differentiated (HPE NGCH/HP/26/0133 dated 16/01/2026); lower edge 6 cm from the anal verge.

Stage: cT3c N2a M0 - MRI pelvis 14/01/2026 (EMVI positive, MRF threatened); CECT chest and abdomen 19/01/2026: no distant metastases.

Baseline CEA: 18.6 ng/mL (09/01/2026)

Treatment delivered

Parameter	Details
Technique	3D-CRT, three fields (posterior and two laterals), 15 MV photons, prone on a belly board
Target volume	Primary tumour, mesorectum, presacral and internal iliac nodal regions
Dose	25 Gy in 5 fractions, 5 Gy per fraction, daily
Dates	02/02/2026 to 06/02/2026
Concurrent chemotherapy	None (short-course)
Interruptions	Nil

Acute toxicity

Grade 1 diarrhoea and Grade 1 proctitis on days 4 - 5, settled with loperamide and sitz baths. No urinary toxicity. Weight stable at 64 kg.

Plan

- Consolidation chemotherapy with CAPOX x 6 cycles in Medical Oncology; first cycle on 17/02/2026.
- Restaging MRI pelvis and CECT after chemotherapy, followed by surgical oncology review for total mesorectal excision.
