DISCHARGE SUMMARY

Paediatric Haemato-Oncology Ward

Name:	**Master POTHULA VENKATA SAI TEJA**	UHID:	**RCCC/26/04471**
Age / Sex:	8 years / Male	IP No.:	RCCC/IP/26/1365
Date of admission:	05/06/2026	Date of discharge:	19/06/2026
Consultant:	Dr. Haritha Kolluri	Guardian:	Mr. P. Srinivasa Rao (father)

Diagnosis

Precursor B-cell acute lymphoblastic leukaemia (common B), NCI standard risk; CNS 1; ETV6::RUNX1 positive.

Investigations

- Bone marrow aspiration and trephine biopsy on 06/06/2026 (reported 08/06/2026): 86 % blasts; flow cytometry - B-ALL, CD10 positive.
- FISH report dated 12/06/2026: ETV6::RUNX1 fusion detected; BCR::ABL1, KMT2A and TCF3::PBX1 not detected. Karyotype awaited.
- 2D echo before daunorubicin: LVEF 66 %, structurally normal heart.
- Tumour lysis monitoring: uric acid peaked at 7.9 mg/dL on Day 2; potassium, phosphate and creatinine normal throughout.

Course in the ward

Admitted with fever, pallor and bone pains. Received 2 units of irradiated, leucodepleted PRBC and one apheresis platelet unit. Hyperhydration and allopurinol given for tumour lysis prophylaxis. Right-arm PICC line inserted under sedation on 07/06/2026. Febrile neutropenia on Day 6 was treated with Inj. Piperacillin-tazobactam for 7 days; blood culture sterile. Induction chemotherapy as per the ICiCLe-ALL-14 protocol (standard-risk arm) has been well tolerated apart from constipation and jaw pain after vincristine.

Chemotherapy given during this admission

Day / date	Drugs and doses (BSA 0.91 m2)
Day 1 (08/06/2026)	Inj. Vincristine 1.4 mg IV, Inj. Daunorubicin 23 mg IV, IT methotrexate 10 mg; Tab. Prednisolone 60 mg/m2/day started
Day 4 (11/06/2026)	Inj. PEG-asparaginase 2,050 IU (2,250 IU/m2) IM
Day 8 (15/06/2026)	Inj. Vincristine 1.4 mg IV, Inj. Daunorubicin 23 mg IV, IT methotrexate 10 mg

Medications on discharge

Medicine	Dose	When	Duration
Tab. Prednisolone 10 mg	2.5 tabs (25 mg)	Twice daily after food	Till Day 28, then taper
Tab. Cotrimoxazole 480 mg	1 tab	Twice daily on Sat, Sun, Mon	Continue
Syp. Fluconazole 50 mg/5 mL	5 mL	Once daily	Till end of induction
Tab. Pantoprazole 20 mg	1 tab	Before breakfast	While on steroids
Syp. Lactulose 10 g/15 mL	10 mL	At bedtime	7 days

Advice

- Day 15 chemotherapy in Day-Care on 22/06/2026, with CBC and LFT the previous day.
- Bring the child immediately for fever of 100.4 F or more, bleeding, unusual drowsiness or pain abdomen.
- Hand hygiene, boiled water and home-cooked food; avoid crowds and sick contacts. No live vaccines.
- Mouth care with a soft brush and saline gargles after every meal; PICC dressing weekly in Day-Care.
