UROLOGY & URO-ONCOLOGY OPD

Name:	**DEVI RAM CHAUHAN**	OPD No.:	**JHU/OPD/26/2297**
Age / Sex:	72 / M	Date:	**14-Apr-2026**
Consultant:	Dr. Rajinder Singh Negi	From:	Village Kotkhai, Distt. Shimla

- C/o: poor stream, nocturia 4 - 5 times, low back pain x 3 months, worse at night.
- Past: TURP at Mandi about 5 years back. COPD on inhalers. Ex-smoker (quit 10 years ago).
- O/E: ECOG 1. DRE - hard, nodular prostate, both lobes; right side extending beyond the capsule; median sulcus obliterated. Tenderness over L2 - L3.
- S. PSA (12/04/2026): 86.4 ng/mL.
- TRUS biopsy HPE (08/04/2026): acinar adenocarcinoma, Gleason 4 + 4 = 8 (Grade Group 4) in 9 of 12 cores.
- Bone scan (13/04/2026): multiple skeletal metastases - spine, pelvis, ribs, right femur.

Impression

Ca prostate, high-volume metastatic hormone-sensitive disease (cT3a Nx M1b).

Plan

- Androgen deprivation: anti-androgen cover for 2 weeks, then an LHRH agonist depot - prescription given separately.
- Discussed adding abiraterone or docetaxel; to decide after CECT abdomen and LFT. Medical oncology opinion.
- MRI spine if the back pain increases or there is any weakness of the legs.
- Review after 3 weeks (05/05/2026) with PSA, LFT, RFT and blood sugar.
