IMMUNOHISTOCHEMISTRY REPORT - BREAST CARCINOMA PANEL

Patient Name:	**Mrs. SUNITA DESHMUKH**	IHC No.:	**NP/IHC/26/0412**
Age / Sex:	51 Years / Female	Histopathology No.:	NP/26/03317 (reported 18/03/2026)
Referred by:	Dr. Prashant Gaikwad, Triveni Multispeciality Hospital, Nashik	Report Date:	**28/03/2026**
Specimen:	Wide local excision, left breast (block A7)	Block Received:	18 Mar 2026

Result

Marker	Result	Details
Estrogen receptor (ER), clone SP1	**POSITIVE**	Nuclear staining in 90% of tumour cells, strong intensity. Allred score 8/8.
Progesterone receptor (PR), clone 1E2	**POSITIVE**	Nuclear staining in 60% of tumour cells, moderate to strong intensity. Allred score 7/8.
HER2/neu, clone 4B5	**Score 1+ (NEGATIVE)**	Incomplete, faint membrane staining in more than 10% of tumour cells.
Ki-67 proliferation index	**20%**	Hot-spot assessment, 500 tumour cells counted.

ER, PR and HER2 were evaluated as per ASCO/CAP guidelines. Positive and negative external controls and internal controls were satisfactory.

This report should be read together with histopathology report NP/26/03317 dated 18/03/2026.
