DISCHARGE SUMMARY

Name:	**Mrs. MEENAKSHI SUNDARESAN**	IP No.:	**AOB/IP/26/1129**
Age / Sex:	51 Yrs / Female	UHID:	AOB/26/03381
D.O.A.:	22.06.2026	D.O.S.:	23.06.2026
D.O.D.:	27.06.2026	Consultant:	Dr. R. Senthilkumar

Final diagnosis

Carcinoma left breast (invasive ductal carcinoma on core biopsy). Type 2 diabetes mellitus. Systemic hypertension.

Procedure

Left modified radical mastectomy (MRM) under GA on 23.06.2026.

Investigations

Bone scan (16th June 2026): no skeletal metastases. CECT chest and abdomen (17th June 2026): no distant metastases. Pre-operative blood counts, renal and liver function within normal limits; HbA1c 7.4 %.

Course in hospital

Post-operative period uneventful. Blood sugars controlled with an insulin sliding scale; oral agents resumed on POD 1. Drain output 60 mL on the day of discharge; sent home with the axillary drain in situ and taught drain care. Shoulder exercises taught by the physiotherapist.

HPE report awaited (specimen sent to Kadambavanam Pathology Laboratory).

Discharge medications

Drug	Dose	Frequency	Duration
Tab. Ultracet (Tramadol 37.5 mg + Paracetamol 325 mg)	1 tab	BD	5 days
Tab. Pan 40 (Pantoprazole 40 mg)	1 tab	OD before breakfast	7 days
Cap. Cephalexin 500 mg	1 cap	TDS	5 days
Tab. Metformin 500 mg	1 tab	BD	Continue
Tab. Telmisartan 40 mg	1 tab	OD	Continue

Record the daily drain output. Review in Breast Clinic OPD on 02.07.2026 for drain removal and the HPE report. Come earlier for fever, redness or swelling.
