MEDICAL ONCOLOGY - OUT-PATIENT RECORD

Date: 10 August 2026 OPD Reg.: YOC/26/0952 Seen by: Dr. Pema Choden Lepcha

Ms. Tenzin Dolma Bhutia, 32 Y, F. School teacher from Namchi. Referred by Dr. Karma Wangchuk (ENT surgeon).

History

Painless swelling on the left side of the neck x 4 months; drenching night sweats and low-grade evening fever x 6 weeks; weight loss about 5 kg; generalised itching. Dry cough, no breathlessness. No known co-morbidity. Unmarried; LMP 01/08/2026.

Examination

ECOG 1. Matted left supraclavicular and level IV nodes, 4 x 3 cm; right level III node 1.5 cm; healed excision-biopsy scar on the left neck. No axillary or inguinal nodes. No hepatosplenomegaly.

Reports reviewed

Investigation	Date	Result
Excision biopsy, left cervical node - HPE	30-07-2026	Classical Hodgkin lymphoma, nodular sclerosis type
PET-CT (whole body)	06/08/2026	FDG-avid left cervical, supraclavicular and right level III nodes; bulky anterior mediastinal mass 10.5 cm; no infradiaphragmatic or extranodal disease
CBC, ESR, LFT, RFT, LDH; HIV, HBsAg, HCV	07/08/2026	Hb 11.2 g/dL, ESR 64 mm/h, LDH 412 U/L, others normal; viral markers non-reactive

Diagnosis

Classical Hodgkin lymphoma, nodular sclerosis; Ann Arbor stage IIB with bulky mediastinal disease (unfavourable early stage).

Plan

- ABVD x 6 cycles (D1 and D15, every 28 days) with interim PET-CT after 2 cycles; consolidation RT to be decided by the tumour board.
- Baseline 2D echo and PFT with DLCO before bleomycin; dental check.
- Fertility counselling done; oocyte cryopreservation offered, declined by the patient after discussion with the family.
- C1D1 on 14/08/2026 in day-care.
