DISCHARGE SUMMARY

Name:	**Smt. BIMALA DEVI SAHU**	IP no.:	**IMH/26/05540**
Age / Sex:	54 Years / Female	DOA:	01-04-2026
Consultant:	Dr. Prabhat Sahoo	DOD:	07-04-2026

Diagnosis

Gall bladder mass with cholelithiasis, incidentally detected during evaluation for right upper abdominal pain.

Operative procedure

Radical cholecystectomy with resection of liver segments IVb and V and regional lymph node dissection on 03-04-2026 under general anaesthesia.

Course

The patient was admitted for planned surgery. The post-operative period was smooth. She was shifted from the ICU to the ward on the first post-operative day, the drain output reduced steadily and the drain was removed on day 4. Oral feeds were started on day 2. She is passing stools and is ambulant. Wound is healthy.

HPE report awaited at the time of discharge; the patient will be informed once it is available.

Advice

Tab. Paracetamol 650 mg three times a day for 5 days if pain; Tab. Pantoprazole 40 mg once a day before breakfast for 14 days; Cap. Ursodeoxycholic acid 300 mg twice a day for 4 weeks. Light, low-fat diet. Suture removal on 13-04-2026. Review in Surgical Oncology OPD with the HPE report.
