DISCHARGE CARD

Patient:	**GEETA KULKARNI (Mrs.)**	MRD No.:	**NIMS/MRD/26/04418**
Age / Sex:	57 yrs / Female	Ward:	Gynaec Ward, Bed 7
D.O.A.:	16-Feb-2026	D.O.D.:	24-Feb-2026
Unit:	Gynaecologic Oncology	Consultant:	Dr. Mukta Bhalerao

Diagnosis

Right adnexal pelvic mass with ascites.

Surgery

Total abdominal hysterectomy with bilateral salpingo-oophorectomy and infracolic omentectomy on 18-Feb-2026 under general anaesthesia with epidural analgesia.

Hospital course

Uneventful recovery. Epidural catheter removed on post-operative day 2; oral diet from day 2; drain removed on day 4. Ambulatory since day 3. Wound healthy at discharge, vitals stable.

Investigations

CT abdomen and pelvis dated 03/02/2026 (Pratik Diagnostic Imaging) reviewed. Pre-operative CA-125 was raised. Haemoglobin 10.9 g/dL on the day of discharge.

Pending at discharge

HPE report awaited; specimen sent to an outside laboratory. To be collected at the follow-up visit.

Medications on discharge

Medicine	Dose and timing	For
T. Paracetamol 650 mg	1 tab TDS after food, if pain	5 days
T. Pantoprazole 40 mg	1 tab OD, empty stomach	7 days
T. Cefixime 200 mg	1 tab BD after food	5 days
T. Ondansetron 4 mg	1 tab SOS for vomiting	3 days

Review in Gynaec OPD on 02-Mar-2026 with the HPE report. Suture removal on 03-Mar-2026. Report to casualty for fever, wound discharge or severe pain.
