MOLECULAR PATHOLOGY REPORT - EGFR MUTATION ANALYSIS

Patient:	**Mrs. PARVATHY IYER**	Block no.:	**KB/26/0912**
Age / Sex:	72 / F	Report date:	**02-Apr-2026**
Specimen:	FFPE tissue block, right lung biopsy	Method:	Real-time PCR
Referred by:	Dr. T. K. Menon, Panchajanya Hospital	Block received:	27-Mar-2026

Gene region	Result
EGFR exon 19 deletions	**DETECTED**
EGFR exon 21 L858R	Not detected
EGFR exon 20 T790M	Not detected

ALK (D5F3) immunohistochemistry will be reported separately.

The test was performed on tumour-rich tissue (more than 30 % tumour cells). A negative result does not rule out a mutation below the detection limit of the assay.

Dr. Latha Nair
