RADIOTHERAPY COMPLETION NOTE

Name: Mrs. Hansa J. Patel Age / Sex: 59 / F Reg. No.: ACC/26/1874 Date: 12 June 2026

Diagnosis: Ca cervix, keratinising SCC, FIGO 2018 stage IIIB

Intent: Radical (definitive chemoradiation)

Treatment details

Component	Details	Dates
External beam radiotherapy		
EBRT - pelvis	IMRT, 6 MV; 50 Gy / 25 # at 2 Gy per #, 5 # a week; weekly CBCT	16/04/2026 to 21/05/2026
Concurrent chemo	Inj. Cisplatin 40 mg/m2 weekly, 5 cycles	During EBRT
Brachytherapy		
HDR brachytherapy (ICRT, Ir-192)	Tandem and ovoids; 7 Gy x 3 # to HR-CTV D90 / point A	28/05, 04/06 and 11/06/2026

Overall treatment time 57 days. No unplanned interruption.

Toxicity

Grade 2 diarrhoea in week 3 (treated by her family physician), Grade 1 cystitis, Grade 2 anaemia needing one unit of PRBC in week 5. No neutropenic fever.

Response at completion

Growth regressed; cervix flushed, residual nodularity in the right parametrium. Response assessment MRI pelvis after 3 months.

Advice

- Vaginal dilator use from 4 weeks after completion, 3 times a week.
- Review in RT OPD after 6 weeks (24/07/2026) with CBC and RFT.
- Continue the diabetic and antihypertensive medicines as before.
