RADIOTHERAPY TREATMENT SUMMARY

Name:	**RAMESH PRASAD YADAV**	RT No.:	**SGR/26/0418**
Age / Sex:	56 Y / M	Summary date:	**29th May, 2026**
Referred by:	Dr. A. R. Sinha, Kumhrar Cancer Hospital	Radiation oncologist:	Dr. Smriti Kumari

Diagnosis: Ca left buccal mucosa, s/p composite resection + left MRND + PMMC flap (17.03.2026).

Histopathology: WDSCC, pT4a pN2b; margins: closest 3 mm (posterior soft tissue); PNI present; ENE absent.

Intent: Adjuvant (post-operative) chemoradiation

Parameter	Details
Technique	IMRT (7 fields), 6 MV photons, thermoplastic mask, daily kV imaging
Dose	PTV-high risk (tumour bed and left neck) 60 Gy / 30 #; PTV-elective (right neck levels I - IV) 54 Gy / 30 # (simultaneous integrated boost)
Start date	13/04/2026
Completion date	25/05/2026
Concurrent chemotherapy	Inj. Cisplatin 40 mg/m2 weekly x 5 (6th withheld for mucositis)
Treatment gap	3 days in week 3 for Grade 3 mucositis

Acute reactions

Grade 3 oral mucositis and Grade 2 dermatitis over the neck by week 5; managed with analgesics, mouth care and nasogastric feeding for 2 weeks. Weight loss 5 kg (62 to 57 kg).

Advice at completion

- Soft, high-protein diet; continue mouth care with saline-soda gargles.
- Jaw-opening exercises with ice-cream sticks, 3 times a day.
- Follow-up in RT OPD after 6 weeks, then every 2 months. CECT / PET-CT of the head and neck at 3 months.
